FABRICS

OBA Australia's fabric range comes in a large variety of classic and contemporary colours to suit any building or façade. These fabrics are designed to take the toughest of conditions and boast one of the strongest tear strengths on the market. All of the fabrics used by OBA Australia are European made and specifically designed to be used for all external blinds and awnings including zip systems. All of the fabrics are different and some has more advantages than the another, some of them are anti-static for easy cleaning, anti-fungal and fire retardant, providing years of safe low maintenance use. Please consult with our representative for the best solution.

POWDER COATING FINISHES

To achieve the best quality, we choose to use one of the most respectful and reliable powder coating companies in our state.

The aluminium used in our products is given preventative treatment to seal the coating on its surface after it has been cleaned. This effectively slows down the aggressive effects of weathering and salty spray.

Powder coating further increases the protection given to the aluminium, against corrosion and weathering.

Its mechanical features are also highly sophisticated.

CONTROLS / OPERATION

There are a range of options to control our outdoor shading products, from conventional manual controls, with a simple crank gear or spring solution, to our premium motorised systems
