LOUVRE ROOF SYSTEMS

Med Twist LR200 Tilting Louvre Roof

- Premium modular tilting louvre roof system.
- Constructed with extruded aluminium slats that can be adjusted up to 135° angle.
- Intricately designed trapezoid blades direct water drainage towards the supporting posts while keeping the roof watertight.
- Can be mounted on walls, ceilings or as a free-standing unit.
- Coupled system enables up to 10 modules to be connected seamlessly for areas up to 25 metres wide.

Med Opra Retractable Louvre Roof

- Luxury retractable louvre roof system.
- Innovative space-saver that provides a truly unique and comfortable outdoor living space.
- Features automated louvres that adjust the shading over area when retracted or open. When the louvres are completely closed, the top area of the system is water-resistant.
- The restrained gutter catches rainwater, draining it directly down the vertical posts.
- This retractable louvre roof is a flat-mounted system supported by front posts and is therefore applied as a lean-to-wall module.
- The maximum dimensions of a single module are 4,000 millimetres wide by 7,060 millimetres projection. This provides coverage of 28 square metres.

ALUMINIUM LOUVRE SCREENS

- Elliptical aluminium louvre blades provide unparalleled privacy from neighbouring properties while maintaining views.
- Mounted in a vertical direction, the sturdy aluminium blades can be fixed or adjustable by manual or motorised operation.
- Blade sizes range from 160mm to 200mm with the choice of over 100 premium Dulux or Interpon powder coating colours.

ALUMINIUM SHUTTERS

- Aluminium shutters offer similar features to louvre blades, yet are mounted in a horizontal direction.
- 85mm blades can be fixed or adjustable by manual or motorised operation, while the panel offers fixed or sliding options.

EXTERNAL VENETIAN BLINDS

- Australian made External Venetian Blinds offer an energy-efficient solution for controlling solar heat, regulating airflow and ensuring privacy.
- These blinds use aluminium slats which can deploy for full window coverage - tilting from 0° to 130° for varying light filtration.
- These blinds fully retract by manual or motorised operation.

ALUMINIUM BATTEN SYSTEMS

Cliplock | Channel | Rail Privacy Screens With A Difference

- Enhances privacy while seamlessly modernising your home or buildings facade.
- Custom-made locally to suit your privacy needs, light filtration and design preferences.
- Ideal for both residential and commercial dwellings.
- High performing and built to withstand the harsh Australian climate.
- Aids in obtaining BASIX certifications.
- Constructed from non combustible powder coated extruded aluminium.

Available in three options:

- **Cliplock** - Premium system for superior quality and strength, without any visible screws or rails.
- **Channel** - Ideal for quick screens and partitions. Battens fit into a top and bottom channel.
- **Rail** - Minimalistic fencing solution and effective privacy screen. Two part rail section creates minimalistic look with no visible screws, as battens attach to top and bottom rails.

Cliplock

Channel

Rail - shroud fix

Rail - face fix

Custom made:

- Choose from over 100 premium Dulux or Interpon powder coating colours - including 3 high quality wood grain finishes.

Chestnut

Casuarina

Western Red Cedar

POLYCARB PERGOLAS

Flat Polycarb Pergola

- Flat Patio Covers are becoming increasingly more popular due to their modern aesthetic, designed with a 4-5° slope for efficient water runoff and optional gutter attachment. Utilising aluminum box sections for support, beam sizes vary based on projection length. Our frames are rigorously engineered to meet strict standards for structural integrity.
- Ideal for areas in need of rain and UV protection without reducing too much natural light.
- 99.9% UV protective, while permitting natural light through its lightweight material.
- Can withstand up to 25mm hail stones and is resistant to rust and cracking.

RETRACTABLE FABRIC ROOFS

Med Evo

Retractable Fabric Roofs

- Open or close the roof to suit any weather conditions.
- Choose from a range of waterproof fabrics: translucent, blackout or PVC.
- Able to tolerate high wind speeds up to 100km per hour.
- The high fabric tension and integrated gutter system ensure quick drainage on rainy days.
- Cover areas up to 30 square metres as one module.
- Customisable incline from 10° to 25°.

Available in three options:

- **Med Evo Air** - designed to integrate with existing outdoor pergola or roof structure, suitable for installation against any type of support structure or framing.
- **Med Evo Pro** - self-supporting with a slim, minimalistic integrated frame with drainage system made of structural aluminium and powder coated in your choice of colour.
- **Med Evo Pro FlexWood system** is constructed with a beautiful architecturally-designed linear natural timber support frame.

Additions & Accessories:

- Clear Plastic Vertical Awnings or Zip Drop Awnings.
- Side/Front Retractable Fabric Awnings.
- LED Lighting.
- Electric Heaters.

FOLDING ARM AWNINGS

CUBEBOX

Superior Design Awning

- Ultimate in style, design and protection.
- Compact Full-Cassette Folding Arm Awning.
- Fully enclosed headbox is engineered to protect the operating mechanism and fabric against dirt, rain and humidity.
- Discreet and blends into most architectural styles.
- Low-depth profile, heavy duty tilting point, slim arm design and fully motorised.

CLEO

Future Proofed Contemporary Awning

- Designed for longevity.
- Semi-enclosed aluminium cassette keeps the fabric and hardware hidden when it's not in use – providing extra protection against dirt and corrosion.
- Well-devised drainage system prevents water from seeping into the box and keeps the fabric looking great for years to come.
- Arms are equipped with built-in springs.

ARIA

Classic Folding Arm Awning

- Provides excellent shading from the sun and light rain.
- Custom made to measure.
- Available in over 200 fabric designs and an extensive range of powder coated frame colours.
- Can be constructed up to 7 metres wide by 4 metres projection.
- Can be operated manually or motorized.

FABRIC OUTDOOR BLINDS

ScreenTex Classic

- Easy and versatile way to maximise your outdoor space.
- Add value to your property without costly renovations.
- Can be installed on almost any structure.
- Perfect for open plan installations. When the blinds are retracted, absence of any guiding mechanisms create obstruction free space.
- Sealed head box hides the base bar and the canvas from the weather elements
- Operation Options:
 - Manual Operation; Traveling double waited base bar with fixing clips.

ScreenTex Wire

- Equipped with wire guides along the edges of each blind.
- Fabric of the blind can be lowered at the desired height at any time on stainless steel side cables of 3.2mm.
- Wire guides insure the external blind stays in place and would not move in the wind.
- Stable, silent, simple and modern
- Ideal solution for the insertion in windows and terraces.
- Operation Options:
 - Manual Operation
 - Motorised Operation

ScreenTex ZIP

Sealed Outdoor Blinds System

- Modern streamline design.
- Recess installation for vertical facades and window surfaces.
- Specially designed zipper ribbons and aluminium side channels create no gaps - providing a seal that won't blow out in the wind.
- Available in two variations:
 - Open style brackets for discreet installation in recess
 - Modern 130mm rectangular headbox
- Operation Options:
 - Manual Operation
 - Motorised Operation

CONSERVATORY AWNINGS

Albatross

Conservatory Awning

- Designed for mounting above skylights, glass roofs and pergolas.
- Guided wheels with aluminium tracks.
- 100mm air cushion encourages air circulation, dissipating any build up heat between the glass surface and fabric.

Albatross Max

Conservatory Awning

- A sturdier alternative to the albatross system.
- Intelligent tension system secures the fabric on all sides.
- No gaps between the fabric and guide rail to optimise sun coverage and keep rain from pulling on the awning.

PIVOT ARM AWNINGS

Metro

Pivot Arm Awnings

- Alternative to vertical blinds.
- Easy to operate.
- Adjustable drop angles 0° to 160°.
- Extremely wind-resistant due to the separate structure and strong drop arms.
- Designed to fit all buildings and any type of windows.
- Up to 5 metres wide.
- Hooded or open style options.

Fixed

Pivot Arm Awnings

- Economical option with the ability to cover large areas.
- Ideal for commercial properties looking for a sharp, clean, minimalist look.
- Unique aluminium framework system that is neat and strong.

CANOPY AWNINGS

Traditional Canopy Awnings

- Rain, sun and weather protection to any doorway.
- Excellent for sign-writing.
- Constructed from high-quality extruded aluminium and durable fabrics.
- Each Outdoor Blinds & Awnings canopy is fully customised for individual needs.
